GENERIC PROFILES

The following generic profile note extracted from the Job Evaluation Handbook explains the position in cases where the minimum score falls below the relevant grade boundary: (See para 5.2 Section 9)

The band for jobs covered by this generic profile is band e.g. 4. The minimum total profile score falls below the band 4 grade boundary. This is the result of using a single generic profile to cover a number of jobs of equivalent but not necessarily similar factor demand. It is not anticipated that any job will be assessed at the minimum level of every possible factor range. If this were the case it indicates that the job should instead be matched against a band 3 profile. If this is not successful, the job must be locally evaluated.

Profile Label: Pharmacy Support Worker

Job Statement:

 Undertakes duties in support of pharmacists e.g. reception duties in dispensary, packing and supply of drugs and medicines to wards and departments, production of sterile and other products
 Undertakes related clerical duties
