Collaborating across system boundaries

Kelly Angus, Executive Director Of HR/OD & Deputy Chief Executive
Leanne Furnell, Strategic HR Lead
Northumberland County Council (both NHS Secondment)
Our Challenge

Integration, partnerships and working across systems are key goals of the NHS Long Term Plan. This session explores the interfaces between health and social care and what it means to truly collaborate.
Format

- Collaborative
- Aim to work as partners
- System rather than organisational focussed
- To be interactive
- To have a bit of fun
- Establish some new networks
- Last the time outlined for the workshop
A bit about us…..
Making Connections

- Sharing twitter handles
- Sharing experiences
- The workshop is just a start
- Thinking and sharing wider than today

@NHSE_DoOD
Long term integration, partnerships and working across systems is a key focus of the NHS long term plan and the system priorities are categorised as:

- Role of patients and carers
- Integrated care and population health
- Prevention and health inequalities
- Health inequalities
Integrated care and population health

- focus on integrated care systems (ICS) & place-based systems
- Role of partnership boards
- Streamlining of commissioning arrangements
- NHS working in partnership with local authorities, the voluntary sector & other local partners to improve population health
- New performance framework
- Integration index to measure patient & public views

@NHSE_DoOD
Some key points from the NHS Long Term plan

- Direction of social care not outlined in the imminently expected green paper
- Emphasis on funding and developing the workforce
- Move towards a more interconnected NHS?
- For prevention, NHS can complement but not replace the role of local authorities and the contribution of government, communities, industry and individuals
- Renewed NHS prevention programme

@NHSE_DoOD
SO WHAT?

- What are the system(s) that we are working within?
- What do we think about our current sphere of influence?
- What is the extent of collaboration now?
- What would the ideal be?
- What are the challenges and issues of the interface of collaboration and how does this impact on the health and social care system?
Our Do OD Cultural Barometer

for integration, partnerships and working across system boundaries

Current State/Issues
Ideal State/Issues
Our Do OD Cultural Barometer

Assessing the system landscape

How does it feel?

A focus of ensuring delivery has a collaborative impact on patients and residents

@NHSE_DoOD
NOW WHAT?

- What are the current and future implications for me as a practitioner?
- Based on what we’ve covered, what are the implications for me / my organisation/ of community
- Where do we go from here?
- What needs work?
- What can OD do to help?

@NHSE_DoOD
REFLECTION

● How has it felt today to collaborate across the system?
● How has it felt for you as an OD Practitioner?
● Any new learning that you would like us to capture?
● Any questions, final thoughts?
