

Clinical governance and auditing

OH providers supporting NHS staff must demonstrate they have comprehensive systems in place for clinical governance.

OH Services should participate in the Faculty of Occupational Medicine's clinical audit and benchmarking system for OH known as MoHaWK2 and collate the necessary information to participate with this system. Relevant evidence-based guidelines on health at work support include those produced by the National Institute for Health and Care Excellence (NICE) and NHS Health at Work, and others.

OH providers supporting NHS staff should produce an annual quality report which offers an opportunity to demonstrate how well commitments to staff in the NHS Constitution are met and describes plans to support improvements and measure the impact. This includes meeting the pledge to provide support and opportunities for staff to maintain their health, wellbeing and safety.
