

Service audit

OH providers supporting NHS staff should produce an annual audit plan and provide periodic reports demonstrating the actions that have been taken as a result of the audit. This plan should normally be included within and monitored alongside the trust's overall audit plans across all clinical services.

Providers should undertake systematic audit of their clinical practices and participate in national clinical benchmarking/audits of OH.

The main recommended source of audit support is the Faculty of Occupational Medicine's clinical audit and benchmarking tool, [MoHaWK2](#).
